				Before any future event, the organisers can consider compiling a document that explains what the event is about, what Internet governance is, and list some FAQs."		
Evaluation		After 2 years of communicating mainly online, everyone was grateful for the opportunity to meet face-to-face at APrIGF 2022 in Singapore, despite different challenges. The overall comment is that the in-person experience is important for APrIGF and the community.	Co-locating with APSIG and APNIC has been beneficial to all of us, in terms of resources sharing, boosting participation, synergy from participants. Gender ratio is not as balanced as last year, but likely because it included APNIC participants which were mostly male.	The communication and teamwork among different committees and organizations have been greatly improved, supported by excellent leadership of the co- convenors and a strong Event Committee.
